

Associate of Science Degree Program in Biology

Students who complete this program are prepared to pursue the bachelor's degree in biology or a related field at a senior college or university. Biologists are concerned with living organisms and the relationship between organisms and their environment. Most careers in biology require graduate study in a life science area. Many optometrists, veterinarians, and medical doctors major in biology. Other career opportunities include work in botany, agronomy, animal science, ecology, toxicology, pathology, physiology, and biological oceanography.

Listed below is a suggested two-year schedule for this degree. Changes may be implemented by the student in direct consultation with the student's advisor.
