

## Associate of Science Degree Program in Computer Science

Students who complete this program are prepared to pursue the bachelor's degree in computer science or a related field at a senior college or university. Computer scientists develop programs and systems to process vast quantities of information rapidly and accurately. Many systems analysts and programmers major in computer science. Other career possibilities may be found in areas such as computer aided design; computer aided manufacturing, computer criminology, the architecture and development of computer components, and robotics.

Listed below is a suggested two-year schedule for this degree. Changes may be implemented by the student in direct consultation with the student's advisor.
